

Reservoir Engineers

- A broad base of experience, ideally including UKCS
- Ability to work both independently and in a team environment
- Excellent ability to integrate with other disciplines
- First class spoken and written English

The ideal candidate will have a degree in petroleum engineering or a related science or engineering discipline and proven experience, with a mature approach. Pragmatic problem-solving abilities are essential in addition to strong reservoir simulation and classical reservoir engineering skills.

Candidates with proven expertise in one or more of the following areas will be preferred:

- Fluid characterisation and PVT modelling
- Heavy oil appraisal and development
- Enhanced Oil Recovery (EOR)
- Tight gas appraisal and development
- Carbonate reservoirs

To apply, please send a CV and covering letter to chris.black@senergyltd.com or post to:
