

Senergy Geologists

We are looking to recruit well qualified and experienced geologists to help us deliver our services around the world.

Many of our geologists have an oil company background, which means we fully understand our clients' commercial imperatives, and can take ownership of their key reservoir issues. From basin analysis through prospect generation to field appraisal and development planning, we provide high quality geological interpretations.

Our reputation is built on effective reservoir characterisation through traditional techniques of log correlation, rock property mapping, volumetrics and the efficient integration of dynamic data and the relevant disciplines.

Senergy can resource project teams to undertake geological studies across the oil and gas life cycle to perform:

- Reservoir characterisation
- Mapping and volumetrics
- Integration of static and dynamic data
- 3D geological modelling
- Prospect generation and evaluation
- Portfolio analysis and management

Our geological expertise is fundamental to the success of our integrated studies and Senergy

geologists engage with all disciplines in order to develop improved interpretations and deliver the best possible advice and assistance to our clients. Our [ODM3™](#) software, developed in-house, demonstrates our commitment to high-quality service and products. It provides best-in-class integration, interpretation, correlation and presentation of well data. It's easy and quick to use and is fast becoming the tool of choice for geologists in handling well data-related images.

If you feel that you have the skills and experience gained from working in the international oil and gas industry we would like to hear from you.

Please respond to resourcing@senergyltd.com with a CV and supporting letter
