

Senior Geophysicist

We are currently seeking an experienced geophysicist to fill a challenging role in one of our key client teams. The role will be based in Banchory, working in our client's office as part of a multi-disciplinary team provided by Senergy. Our client has an active programme of appraisal and development drilling in the Southern North Sea. The primary responsibility will be to support this activity and we would seek the following attributes:

Technical Skills

- Seismic interpreter with previous experience of appraisal/development challenges in the UK Southern Gas Basin
- Familiarity with the Kingdom software suite
- Depth conversion experience with a complex overburden
- Understanding of seismic processing workflows (including depth migration)
- Working in integrated field development teams
- Well planning and operational support

Personal Skills

- Strong presentation skills
- Working to tight deadlines
- Good team worker

The role is an exciting one with a high level of planned drilling activity in a very dynamic environment. The successful candidate will be seconded to the Senergy client team for a period of at least 18 months. After this period, other opportunities will be available to move within the Senergy organisation.

To apply, please send a CV and covering letter to chris.black@senergyltd.com or post to:
