

## Principal Reservoir Engineer

### **BUSINESS DEVELOPMENT & STRATEGY:**

Development of yearly sub-surface business plans as part of the broader Senergy Ltd business plan. This includes interaction with the other functional groups as required.

Recruitment and professional development of sub-surface personnel for roles within the group. Development of personnel by training and on the job experience.

### **PROJECTS:**

Supervision and management of specific sub-surface projects. Company expectation is that Senior Managers in Senergy are revenue earning for a target of 50% of their time. This is in order to maintain technical awareness and to ensure sufficient engagement in project and project outcomes.

To work with other technical disciplines in the delivery of multi-discipline projects.

### **QHSE:**

Implementation of Senergy QHSE systems as relevant to sub-surface operations. Development of specific procedures in line with the sub-surface group requirements.

### **MENTORING:**

The company places great store on developing the skills of its workforce and has an active mentoring programme.

### **COMMUNICATION:**

Attendance at relevant management meetings. Ensure communication across the sub-surface group with regard to relevant technical and group management matters.

### **PERFORMANCE:**

To be performance focused in the delivery of projects and Senergy products, without compromising Health, Safety and the Environment.

### **KEY FUNCTION:**

Responsible for the functional and technical management of the sub-surface group (reservoir engineers, geologists, geophysicists, petrophysicists) based in KL.

- Strategic development of the sub-surface group based in KL.
- Undertake business development activities within the region to enable further penetration of Senergy into current business streams and into new and complementary business streams.
- Support the development of sub-surface functions in other Senergy locations worldwide.
